

Speak Up™ About Your Medications

Medication safety is a team effort. You, your doctor, pharmacist, and other caregivers all have a role in making sure you get the right medication, take the correct dosage, and avoid bad reactions. It's important to know what questions to ask about a new medication and to Speak Up if something doesn't sound right.

Your medication list is your first responsibility

Make sure to update your medication list whenever you are prescribed a new medicine. Carry your list with you, and share it with your doctor, pharmacist, and other caregivers.
